# AAYUSH RAGHUVANSHI

iOS Engineer | Swift, SwiftUI & REST APIs

aayushraghuvanshi21@gmail.com | 857-869-9856 | linkedin.com/in/aayushr12/ | Atlanta, GA

## SUMMARY

iOS Engineer with 4 years of experience building native iOS applications for banking, commerce, and money-movement products. Delivered >85% test coverage, reduced post-release defects by 40%, and achieved zero rollbacks across production releases. Builds clean, testable, maintainable **Swift** code with **SwiftUI**, MVVM, REST APIs, Keychain, and biometrics while handling async data. Brings secure authentication flows, application reliability, and end-to-end feature ownership to fast-moving, high-ownership teams.

## WORK EXPERIENCE

### iOS Engineer | Tech Consulting
**January 2025 - Present**

- Led Native iOS application development for prescription management, patient profiles, commerce, debit-card, and money-movement features with **Swift**, **SwiftUI**, **UIKit**, and **MVVM**.
- Implemented secure authentication flows with **Keychain**, biometrics, and secure storage for PCI-compliant banking features, supporting offline-first performance through **REST APIs** and async data.
- Delivered over 85% test coverage with XCTest/XCUITest and reduced post-release defects by 40% through targeted validation and **Xcode** Instruments analysis.
- Reduced rework by ~30% by establishing early architecture alignment, clarifying technical tradeoffs, and applying clean, testable, maintainable Swift code.
- Resolved production issues with an under 2-hour mean time to resolution, improving application reliability through targeted performance optimization and on-call support.
- Optimized network payloads, caching, and app startup to reduce cold-start times by 25% and maintain a 99.9% crash-free user rate.

### Full Stack Developer Intern | Geaux Network
**July 2024 - December 2024**

- Delivered responsive user-facing features from design wireframes, translating requirements into polished interfaces aligned with firm objectives.
- Built maintainable front-end experiences during a five-month internship, balancing implementation details with responsive design expectations.
- Improved feature delivery by refining design-to-code execution and aligning user-facing work with stakeholder requirements.

### MTS Software Engineer | Interra Information Technologies
**January 2022 - July 2023**

- Designed intuitive, responsive interfaces with UI/UX designers and senior developers, strengthening user engagement across corporate client projects.
- Improved process efficiency by 15% by streamlining development workflows and applying consistent coding practices.
- Increased project efficiency by 20% through Agile collaboration, early alignment with senior developers, and disciplined delivery for large-scale corporate client work.

## SKILLS

- **iOS Development:** Native iOS application development, iOS app architecture, Swift, SwiftUI, MVVM, Xcode, App Store submission process, REST APIs, async data, UIKit, Asynchronous data handling
- **iOS Security, Performance & Reliability:** iOS security fundamentals, Keychain, Biometrics, Secure storage, Passkeys, Push notifications, Background tasks, Offline-first app design, Secure authentication flows, App performance optimization, Application reliability, Memory usage optimization
- **Payments, Fintech & Backend Technologies:** Payment SDKs, Tap to Pay on iPhone, Fintech, Payments, POS systems, NMI's ChipDNA SDK, Real-time webhook-driven data, Node.js, NestJS
- **AI Tools & Engineering Practices:** maintainable Swift code, Claude Code, Cursor, AI coding tools, Clean, testable, Code reviews, Prompt-driven workflows

## EDUCATION

**Master of Science in Computer Science** | Boston University
January 2023 - January 2024

**Bachelor of Technology in Computer Science and Engineering** | GLA University
January 2018 - January 2022

## AWARDS

### Software Engineer Trainee | InterraIT

- Software Engineer Trainee, InterraIT
